Professional Profile

Highly technical Software Engineer, First-Class Honours graduate (9/10 equivalent). Specialized in full-stack development, data architecture, process automation, and applied Machine Learning / Edge AI systems. Demonstrated ability to design scalable solutions, optimize system performance, and enforce web security standards (OWASP) in dynamic production environments.

Work Experience

Development Technician Apr 2025 – Jun 2025
Universidad Nebrija (Madrid)

- Full-stack development of robust solutions, optimizing user experience, stability, and system scalability (Frontend and Backend).
- Design and implementation of efficient REST APIs to integrate third-party services, ensuring security in data transfer.
- Execution of unit and integration tests (software testing) to ensure code quality and reduce failures in production.

Education and Training

BSc (Hons) Software Engineering
York St John University Equivalent average grade: 9/10 | First-Class Honours (Class I)

Higher Level Vocational Training in Cross-Platform Application Development (DAM)
Instituto de Formación Profesional Nebrija

Key Projects

Final Degree Project (TFG): Bitcoin Forecasting System Grade: 9.0/10 | 2026

- Machine Learning pipeline (Scikit-learn, Pandas) for cryptocurrency price prediction via technical analysis indicators.
- Edge AI architecture for decentralized real-time inference, optimizing computational throughput and latency.

Secure Record Management System (SRMS) 2026

- High-security web application built in Go (`net/http`, SQLite) strictly mitigating OWASP Top 10 vulnerabilities.
- Role-Based Access Control (RBAC), CSRF protection, bcrypt hashing, and brute-force mitigation via IP rate limiting.

Smart File Organizer (Local AI Daemon) 2026

- Autonomous background daemon in Python with real-time file monitoring (`watchdog`) and multiformat parsing (`pypdf`).
- Automated semantic categorization and sorting powered by local LLMs (Ollama REST API) with strict JSON schemas.

Technical Skills

- **Languages & Frameworks:** Go, Java, Python, JavaScript, TypeScript, C++, Spring Boot, React, Angular, Svelte.
- **Databases & Cloud:** SQLite, JDBC, Firebase, Cloud Deployment & Computing, MySQL, PostgreSQL.
- **Core Competencies:** REST APIs, Unit/Integration Testing, Full-Stack Architecture, Web Security (OWASP Top 10), Machine Learning, Automation & Local LLMs, Edge AI, Linux, Git.

Languages and Other Data

- **Languages:** English (Professional working proficiency / UK Degree) · Spanish (Native).
- **Other:** Technological adaptability, continuous learning, Driving License (Category B), Immediate availability.
